How To Draw Mo'o

Geckos first came to Hawaii aboard the Polynesian voyaging canoes. They were tan or brown varieties.

The Hawaiian word for lizard is mo'o. In recent years bright colored geckos have been brought to Hawaii like this one originally from Madagascar.

Step 1: FORMING-

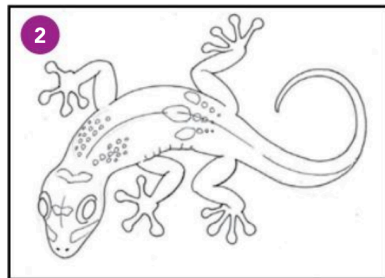

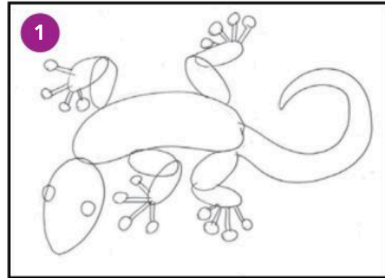

Form up the gecko by softly drawing circles and ovals and lines. Remember to press softly as these lines will just be a guide to follow before adding your final details.

Step 2: OUTLINING-

Using the circles and lines as a guide, make adjustments and do your final outlines for your gecko.

Step 3: SHADING and COLORING-

Using crayons or colored pencils, color your mo'o whatever color you want!
